

Press Release

6-11-15

Bob's Auto Café is pleased to announce its partnership with SK Hand Tools, an IDEAL INDUSTRIES Company; a family-owned, blue-collar American company that believes in serving the hardest working tradesmen in the world.

“When we saw where SK was going with their R and D, and felt their tools in our hands, we knew we had a fit,” said Daniel Lacy, Executive Director at BAC. “And we knew where they had been. When my dad put a hand tool in my hand, back in the mid 60’s, it was an SK Hand Tool. As we train people up in the automotive industry so that they can support their families, we know SK is a family that they can grow with.”

People know SK, not only for high quality products, but for a high level of integrity as well. At a time when other companies took manufacturing jobs overseas, SK recommitted itself to American quality and the American tradesman. With forging facilities in Colorado Springs, and a brand new manufacturing and distribution center in Sycamore, Illinois, all SK professional tools are crafted with American steel in the U.S.A. The American tradesman looks to SK Hand Tools for quality and precision they can trust.

Bob's Auto Cafe looks forward to its partnership with SK Hand Tools. Such trustworthy and reliable hand tools will assist Bob's Auto Cafe to train up skilled automotive workers. The right tools-SK hand tools-will empower Bob's Auto Cafe to service cars of the community for a reasonable charge. SK Hand Tools are available through Mobil and National Distributors.

Bob's Auto Café is a 501 (c)3 non-profit that trains people, services cars and cares for community.
